

Persian Gulf Power Generation Co.

Iranian Privatization Organization (IPO)  
Marketing & SOEs Divesting Office

## **Persian Gulf Power Generation Co. (public joint-stock)**

### **Part I: General Information**

Persian Gulf Power Generation Company was registered in 2008 at Bandar Abbas State Organization for Registration of Deeds & Properties and started its operation since the beginning of the second half of the same year. Capital of the company equals to 340 billion Iran Rials that has been provided from transferring parts of assets belonging to TAVANIR in Persian Gulf Power Plant. The main centre of the company is in Bandar Abbas and the power plant is located in 30 Km of Bandar Abbas-Minab Road.

This power plant includes 6 gas units which are made by Alstom Company of Switzerland and nominal capacity of each unit is 165 MW (the total nominal capacity is 990 MW). But operational production of each unit on average is about 140 MW with gas fuel. The main fuel of the power plant is gas and the secondary fuel is gas oil. The capacity of oil and gas tanks equals to 40 billion liters and the capacity of gas station equals to 270,000 cubic meters in an hour. The water needed for the power plant is provided by two wells that are located in 5 km of the power plant.

Regarding machinery & equipment, the power plant is exclusive in comparison with other gas power plants of the country. Finally spare parts needed for the power plant (in case of overhaul) have to be bought from the major manufacturer (Alstom Co.). According to recent agreements in political field between Iran and 5+1 countries, having the needed spare parts will be facilitated.
